DETAILED ACTION

1. In response to the amendment filed on 06/1/2003, claims 1-13 are pending in this application as result of additional of claim 10-13.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1,3 and 10-13, the phrase "Ne²⁰ isotope and an Ne²² isotope" render the claim indefinite because it is unclear. The claim only recites the linear gas laser. The claim does not specify anything on Ne²⁰ and Ne²² isotope to do with laser. Further, the claim does not recite any structure for frequency stabilized linear HeNe gas laser that can read on figure and does not show any element to recite the feedback. The phrase "in use" is use functional language; it is not the claim language.

Claims 4-9 depend from rejected claim 1, and 3 thereby render these dependent claims indefinite.

Claim Rejections - 35 USC § 102

Art Unit: 2828

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U. S. C. § 102 (b) as being anticipated by Sanders et al., U.S. patent No. 4,475,199.

Regarding claims 1-2, 6-9, Deck discloses an optical apparatus comprising frequency stabilized linear HeNe gas laser (See abstract) having a resonant cavity, and optical elements (See column 5, line 63-69 and column 6, line 1-5). It is inherent that at least 0.1% of light output of the laser to be returned toward the laser that means the range of light to be return is very big so all the light feedback to have on that range, Ne²⁰ and Ne²² isotope in substantially equal proportions (See column 9, line 37-44 and fig. 8). It is inherent that the device being any one of a single light, plane mirror, a long range, or an optical fiber type.

Regarding claim 3-5, and 10-13, the recitation that interferometric displacement determination device, a polarization measurement device, a spectroscopic analysis apparatus and heterodyne frequency has not been given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self-contained description of the structure not depending for completeness upon the introductory clause. *Kropa v. Robie*, 88 USPQ 478 (CCPA 1951).

Response to Arguments

3. Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection. Further, with respect to applicant's response to the 35 U.S.C. 112, 2nd paragraph, applicant fails to fix the problems in the claim instead of just pointing out the definition as recited in the specification. Applicant's argument is not persuasive, and the response fails to overcome the 35 U.S.C. 112, 2nd paragraph rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
